Saggio breve d'Inglese

Bullying, aggressive behaviour among students ~~which~~ which causes lasting problems. Have you ever experienced or witnessed it?

Which are, according to you, the social causes?

19

Among students, above all between ~~between~~ 13 and 15 years, it's still a big problem in the 21st century. But nowadays, we are in the "Social Age", where ~~all~~ our lives are totally on the internet and anyone can surf on our personal thoughts. Who's wrong is ^{even} us sometimes, because we upload everything on the internet; the big problem remains due the cyber-bullies, ~~people~~ teens (usually) with family problems or a mental ~~disorder~~ disorder which ~~they~~ they feel like lions in front of a keyboard, they ~~make~~ mock ~~others~~ others people of the size ~~or~~ or make fun of them, causing 'em lasting problems. They feel abused, intimidated, dominated and, sadly, sometimes commit suicide. Big error. Since when we're kids, we are witness of force's abuse, verbal harassment, ~~but~~ we're also part of it sometimes. Keep in touch with your parents, family and also your teachers, 'cause they can give you not a little help. They're older than you, it means ~~more~~ with more experience. ~~and~~ and ~~more~~ more lived events. Keep thinking ~~that~~ the bullies are the problem and the dumb one, absolutely not you. Remember it. The stakes are high for you.

Mi ha lasciato senza parole
FANTASTICO degno della tua grande
competenza ed educazione!!!
